

Possibilities Beyond the Cloud™

# SECURE BLOX™

SECURE BLOX, powered by CPG, is a turnkey solution with the security of a SCIF, but the flexibility to be designed in shapes and sizes not previously available in the marketplace. SECURE BLOX can add not only a Secure Cloud Solution to your existing data center architecture, but also secure meeting rooms or storage space in customized configurations.

## SECURE BLOX™

Security that fits  
into any space.

Up to **70%** faster  
deployment than  
other secure room  
solutions.

## FULLY SCALABLE SOLUTION

SECURE BLOX bring a secure, accredited solution into the ecosystem of people, clouds, data and things. Designed and powered by CPG, SECURE BLOX offer a secure option to a wide-range of clients looking for custom, accredited, scalable deployment of even the most sensitive data, meetings and IP product storage.

Secure data solution for every institution with a critical environment: The Intelligence Community, Financial Institutions, Government Contractors, Intellectual Property Holders, and Systems Integrators.

help you, contact CPG today!

# SECURE BLOX™

## SECURE BLOX ARE THE FOUNDATION OF YOUR CLOUD SECURITY

SECURE BLOX provide a customized, secure area within data centers, office buildings and warehouses – in almost any location where a secure environment is needed. The secure room is the first step in securing your data.

The CPG team provides secure, private, virtual connections to multiple cloud providers globally with rapid automated provisioning and service orchestration. Our multi-discipline team includes ICS/SCADA Architects, Engineers, Software Developers, Cybersecurity Experts, Network Designers, and Installation and Facility Operation Technicians. The CPG team can add layers of security by bypassing the public Internet, they can improve performance, reduce costs and leverage cloud services for more applications.

## LINK IT SYSTEMS TO CLOUD INFRASTRUCTURE

Your business, whether it's Intelligence, Systems Integration, Financial or a host of others, must have the ability to “amp up” network performance without sending data and apps over risky public or expensive, fixed-bandwidth connections.

## TAILOR APPLICATION FOR AGILE SOLUTIONS

Your network must be able to adapt to usage spikes to deliver fast, consistent applications performance around the globe.

## DELIVER SPEED -TO-MARKET, AND IN PERFORMANCE

Your business needs to be able to add to its network quickly, securely and reliably. And, those additions need to deliver the performance you demand.
